

Molécules - Forme dermique

		Lidocaine hydrochloride			Tetracain hydrochloride
		Morphine hydrochloride			Morphine sulfate
		Oxycodone hydrochloride			Azithromycine
		Ceftriaxone disodium			Clarithromycin
		Dapsone			Metronidazole
		Nalidixic acid			Polyhexamethylene biguanide
		Chlormethine hydrochloride			Erlotinib
		Amitriptyline hydrochloride			Gabapentine
		Voriconazole			Desoximetasone
		Diclofenac			Flucinonide
		Fluocinolone			Hydrocortisone
		Hydrocortisone 17 valerate			Hydrocortisone acetate
		Ketoprofene			Mometasone furoate
		Nimesulide			Piroxicam
		Triamcinolone acetonide			Timolol maleate
		Spironolactone			8-methoxypsoralen
		Adapalene			Arnica tincture
		Azelaique acide			Baclofen
		Benzoyl peroxyde			Cafeine
		Clobetasol propiomate			Dithranol

		Dutasteride			Enoxolone
		Finasteride			Hydroquinone
		Marigold tincture			Resorcinol
		Tretinoin			Calcium gluconate
		Estradiol			Estriol
		Estrone			Gestrinone
		Melatonine			Progestérone
		Testostérone			Ciclosporin
		Sirolimus			Epinephrine hydrochloride
		Diltiazem hydrochloride			Minoxidil
		Nifedipine			Nitroglycerin
		Pentoxifyllin			Nicotinamide
		Pyridoxine hydrochloride
